Lorenzo Moriondo

Web Developer & Founder at Project Chronos

tunedconsulting@gmail.com

Summary

Since I decided to become a developer in 2012, after being a business consultant and have lived in some foreign countries, my main objective has been to be a knowledge and possibilities hub. I like to share links and online courses with people I get in touch with because I really believe in life-long education, and to point out people to resources and activities I think they can enjoy and learn from. In this time I gathered a network of good people especially focused on open-source and open-science. My last passion is spaceflight and space data (e.g. data coming from satellites and space missions), to which I dedicate this part of my life with Pramantha as founder. I'm passionate about philosophy, especially theories that led to discoveries connected to computer science.

Experience

Founder: Operations at Project Chronos

April 2014 - Present (1 year 1 month)

As a part-time effort, I am developing the knowledge base and applications for the project's online platform, and coordinating all the developing jobs for different areas, keeping connections with the stakeholders of the initiative. I coded in a group of four people most of the online material of the initiative. I like to promote collaboration and listening among participants to lead the problem to natural and simple solutions. We are up and running, our manifesto is at: www.pramantha.net

Certifications

Full Stack Web Developer Nanodegree

Udacity   September 2009

Certificate of Completion - M101JS: MongoDB for Node.js Developers

MongoDB   March 2014

Certificate of Completion - David Evans' CS101 Introduction To Computer Science - Building A Search Engine

Udacity   February 2012

TOEFL Test

September 1998 to September 2003

Education

Udacity

Course in Data Science, Data Processing, 2014 - 2014

Grade: Completion

Udacity
Course in Programming Language, Computer Science, 2012 - 2012
Grade: Completion
Udacity
Web Development With Python, Computer Science, 2012 - 2012
Grade: Completion

Skills & Expertise

Python
Web Development
Linked Data
W3C Standards
Semantic Web
Django
ORM
APIs
SQL
Business Modeling
NoSQL
JavaScript
AngularJS
Google App Engine
Tornado
Google Maps API
Testing
MongoDB
JSON-LD
Data Modeling
Business Administration
Python-Flask
Git

Languages

Italian	(Native or bilingual proficiency)
English	(Full professional proficiency)
French	(Elementary proficiency)

Honors and Awards

Top25 Global Nominee at 2014 NASA SpaceApps Challenge

NASA ESA JAXA

May 2014

Project Chronos has been nominated among the global top five in the Best Mission Concept category at the 2014 SpaceApps Challenge.

Volunteer Experience

Translator at   Udacity

February 2012 - February 2013 (1 year 1 month)

   I am into a personal effort to spread code literacy and Opencourseware, so I helped subtitling Udacity's
   courseware in Italian
